

Systematic Basin Study for Opportunity Identification

Trainer:

Herman Darman
Professional and Explorationist

Course Overview

The course is an introduction to play based exploration using geology for making business decision. Objective of the course is to give understanding to participants on play evaluation process and hands-on skill on identifying prospective areas for exploration. In this course, participants will experience approximately 75% of learning by lectures and 25% of workshop exercises.

Prerequisites

Participants are Explorationists with 2-3 years of experience or other Geoscientists who start working on exploration project.

The following topics will be covered in the class

1. Principle of exploration
2. Exploration method
3. Petroleum system elements
(charge, reservoir, trap)
4. Play mapping
5. Common risk segment mapping
6. Dry hole analysis.

Our Trainer

Our trainer is a senior exploration geologist, who has more than twenty years of wide range exploration experiences from near field to frontier setting, both onshore and offshore. Areas of exploration include Central Asia (Common Independent States / Former Soviet Union countries) and Southeast Asian countries. Focus area in the last two years includes South China Sea, Eastern Indonesia and West SEAsia margin projects. As principal exploration geoscientist in the new venture team, he was responsible for identifying and maturing opportunities. Currently based in home country, Indonesia. He started a social enterprise in geoscience called Indogeo. The experiences I gained in several posting locations, such as Indonesia, Brunei, the Netherlands, and Malaysia, stimulate a number of activities for the social enterprise.

What is IGTC?

Activity in oil and gas field in Indonesia is affected by the worldwide oil price down turn condition. In last two years, drilling activity has been slowing down and up to now there is no indication that it has bounced back to its previous condition. With the national production target of $\pm 870,000$ bbls per day whereas the country's energy consumption is increasing, the government still expect oil gas operators to be more willing and be proactive in exploring new fields and drill more wells. Competent personnel is needed to fulfill Indonesia Government objective. Olinesia IGTC wants to be part to provide education and training to improve and enhancing the skill of oil field workers hence helping government in increasing the number of competent personnel in Exploration.

17-19 Nov. 2017
8 AM to 4 PM

The 101 Hotel
Suryakencana
Bogor - Indonesia

Investment Fee (training only):

5.000.000 IDR for Early Birds (< 10 Nov 2017)
5.500.000 IDR for 10 Nov 2017 and after

Investment Fee (3D2N accom. + dinner):

8.000.000 IDR for Early Birds (< 10 Nov 2017)
8.500.000 IDR for 10 Nov 2017 and after
